- **Configuration Tips**

- **Basic Work**

init, clone, add, status, diff, commit, log, pull, push

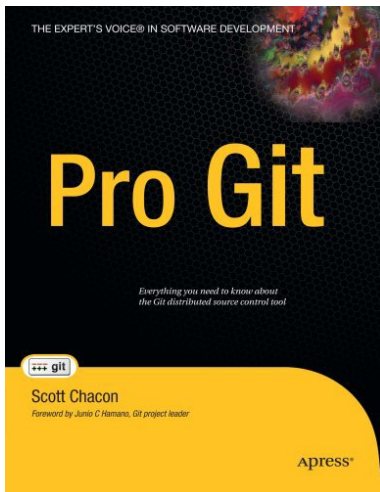

- **Advanced Work**

branch, checkout, merge, rebase, stash

- **Various Tidbits**

blame, fetch, show, tag, bisect, cherry-pick, svn

- **Discussion**

<https://github.s3.amazonaws.com/media/progit.en.pdf>

- `alias g='git'`

- `alias g='git'`
- `autocompletion`

- `alias g='git'`
- `autocompletion`
- `.gitconfig`

Commands

- init
- clone
- add
- status
- diff
- commit
- log
- pull
- push

Commands

- init
- clone
- add
- status
- diff
- commit
- log
- pull
- push

Useful Parameters

- status `-short -branch`
- commit `-verbose`
- commit `-verbose -all`

Commands

- branch
- checkout
- merge
- rebase
- stash

Commands

- branch
- checkout
- merge
- rebase
- stash

Useful Parameters

- `branch -vv`

Commands

- blame
- fetch
- show
- tag
- bisect
- cherry-pick
- svn
